

DUAL LANCE 42"

VELOCI
PERFORMANCE PRODUCTS

ABOUT

MTM Hydro's Dual Lance with Stainless pipes offers a thorough cleaning experience with extreme corrosion resistance. This Italian Dual Lance comes with a pre-installed Chem Nozzle on the Low side and standard 1/4" Female NPT outlet on the High Side. By turning the side handle, you open up the low side and automatically begin drawing chemical through your downstream injector. Dual Lances are the preferred cleaning attachment for hot water applications by applying chemical via low pressure and then cleaning with a pressurized stream while never having to turn the pressure washer off or change equipment.

FEATURES:
